Flight simulator 2020 system requirements

Microsoft Flight Simulator 2020 is finally here, but it might be one of the biggest games ever released. If you want to take off with the game the way it’s meant to be played, then keep reading on for the official recommended system requirements. It’s been a long old wait – 14 years to be precise – for the latest main entry in the Microsoft Flight Simulator series, but as you can guess from Trusted Reviews’ 4.5/5 review, it’s all been worth it. The sheer scope of Flight Simulator 2020 has attracted the attention of potential new fans (myself included), but unless you’re going to opt for the upcoming console version, you might want to double check your PC rig before investing in the game. After all, being able to traverse the world’s skies in-game is no easy feat, and to get the best experience you’ll need a decent computer to tackle it. To give you a hand, we’ve rounded up the official minimum specs, recommended specs and ideal specs. Related: Best Graphics Card Microsoft Flight Simulator system requirements – Minimum specs There’s no point beating around the bush – taking up 150GB of storage space, Flight Simulator 2020 is one of the largest games ever made. Of course, all that storage capacity is precisely why the game is able to pull off its incredibly life-like detail. For that reason, you might want to consider bagging a high capacity SSD to store the game on. Beyond that however, the minimum processor and graphics card specs are very reasonable, and shouldn’t set you back more than £150. To save you the hassle of finding them however, we’ve included links directly to these products in the table above. Microsoft Flight Simulator system requirements – Recommended specs The new Microsoft Flight Simulator is a demanding game, and that’s reflected here in the recommended specs sheet. In addition to the 150GB of required storage, you’ll need at least 16GB RAM to give the game what it needs to soar. The processor and graphics cards aren’t demanding, with the old components available at very low prices if you don’t mind going with some second-hand kit. Related: Best PC Games 2020 Microsoft Flight Simulator system requirements – Ideal specs As well as offering ‘minimum’ and ‘recommended’ specs, Microsoft has also provided the ‘Ideal Specs’ to play Microsoft Flight Simulator 2020. These aren’t system requirements as per say, as the majority of gaming PCs and laptops should be able to run this game without issue, but since one of Flight Simulator’s greatest strengths is its astonishing level of visual fidelity, you’ll need very beefy specs to get the best out of this game. Microsoft recommends the use of Nvidia RTX 2080 or AMD Radeon VII, which are two of the most powerful graphics cards available. The 9th Generation i7 Intel Core processor is pretty pricey too, costing over £300 alone. What’s more, Microsoft suggests you use a whopping 32GB of RAM which is far more than what’s conventionally suggested. Buy all the components listed above, and you’ll have one of the most powerful (and expensive) gaming PCs currently available. Don’t worry though, as Microsoft Flight Simulator offers superb scalability. It all depends on how much you’re willing to spend and how much you care about hyper-realistic visuals. If you simply want it to run on your ageing laptop, you’ll be fine. If you’re happy with a Full HD performance, you should also be absolutely fine going for a cheaper GTX 1660 Ti graphics card, paired with a more affordable processor and 16GB RAM. And if you want the best graphics quality possible, then be prepared to spend a lot of cash. The Microsoft Flight Simulator Game of the Year (GOTY) Edition celebrates all the positive feedback, reviews and awards garnered, but it is also a “Thank You” to our fans – new and old – that have made Microsoft Flight Simulator such a phenomenon. Best of all, the Microsoft Flight Simulator Game of the Year Edition will be available as a free update for existing players on PC. Game of the Year Edition• Enjoy 5 new aircraft – the Boeing F/A-18 Super Hornet, the VoloCity, the Pilatus PC-6 Porter, CubCrafters NX-Cub, Aviat Pitts Special S1S.• Experience 8 handcrafted airports in Germany, Switzerland and the US, an updated weather system, early access to DX12 and a dev mode replay system.• Soar high with 6 new Discovery Flights (Helsinki, Freiburg im Breisgau, Mecca, Monument Valley, Singapore, and Mount Cook) and 14 new tutorials. The World is at your Fingertips.• Vivid and Detailed Landscapes – Immerse yourself in the vast and beautiful world that is our planet with over 37 thousand airports, 1.5 billion buildings, 2 trillion trees, mountains, roads, rivers and more.• Living World – Earth is vibrant and ever-changing and so is the world of Microsoft Flight Simulator which includes live traffic, real-time weather and animals. Earn Your Wings.• Aircraft – Hone your pilot skills in a variety of aircraft from light planes to commercial jets with comprehensive flight models. Every aircraft includes highly detailed and accurate cockpits with realistic instrumentation. • New Checklist System - From pro to beginner, scale your level from full manual to full assist with interactive and highlighted instrument guidance and checklist.Test Your Skills.• Live Weather – The new weather engine enables users to switch on the live weather mode to experience real-time weather including accurate wind speed and direction, temperature, humidity, rain and more.• New Day & Night Engine - experience flight at any time of day or year allowing for night VFR, visual flight rules, navigation.• Aerodynamic Modeling - a state-of-the-art physics engine with over 1000 control surfaces per plane allows for a truly realistic experience.The Deluxe Edition includes everything from Microsoft Flight Simulator plus 5 additional highly accurate planes with unique flight models and 5 additional handcrafted international airports.Deluxe Additional Aircraft• Diamond Aircraft DA40-TDI• Diamond Aircraft DV20• Textron Aviation Beechcraft Baron G58• Textron Aviation Cessna 152 Aerobat• Textron Aviation Cessna 172 SkyhawkDeluxe Additional Handcrafted Airports• Amsterdam Airport Schiphol (Netherlands)• Cairo International Airport (Egypt)• Cape Town International Airport (South Africa)• O’Hare International Airport (USA)• Adolfo Suárez Madrid–Barajas Airport (Spain)The Premium Deluxe Edition includes everything from the Microsoft Flight Simulator Deluxe edition plus 5 additional highly accurate planes with unique flight models and 5 additional handcrafted international airports.Premium Deluxe Additional Aircraft• Boeing 787-10 Dreamliner• Cirrus Aircraft SR22• Pipistrel Virus SW 121• Textron Aviation Cessna Citation Longitude• Zlin Aviation Shock UltraPremium Deluxe Additional Airports• Denver International Airport (USA)• Dubai International Airport (United Arab Emirates)• Frankfurt Airport (Germany)• Heathrow Airport (United Kingdom)• San Francisco International Airport (USA) Minimum:Requires a 64-bit processor and operating systemOS: Windows 10Processor: Intel i5-4460 | AMD Ryzen 3 1200Memory: 8 GB RAMGraphics: NVIDIA GTX 770 | AMD Radeon RX 570DirectX: Version 11Storage: 150 GB available space Recommended:Requires a 64-bit processor and operating systemOS: Windows 10Processor: Intel i5-8400 | AMD Ryzen 5 1500XMemory: 16 GB RAMGraphics: NVIDIA GTX 970 | AMD Radeon RX 590DirectX: Version 11Storage: 150 GB available space Microsoft Studios © 2020 Microsoft Corporation Microsoft Flight Simulator 2020 has created much anticipation around their simulation game. The fans have been going crazy for this new game to be launched. Currently, the makers revealed that the game is supposed to be very heavy. This means that it will require a powerful machine to function on. This is a necessary query as a powerful PC certainly will give an output for a seamless gaming experience. These details can be checked from Flight Simulator 2020’s official website. But if you still have not figured it out, then check our story on Flight Simulator 2020 requirements. Since the game is a bit heavy, it will require some heavy configuration too. Here are all the Flight Simulator 2020 requirements for a fast and lag-free gaming experience. The game is going to be published by Xbox Game Studios exclusively for Microsoft Windows and Xbox One. The makers have confirmed August 18, 2020, as the release date for Flight Simulator 2020. But the makers will only be releasing the PC version of the game. Reportedly, the game is so heavy that it is going to be delivered on a total of 10 DVDs. It might sound a bit much but this would surely be a boon for those with slow or severely constrained internet connections. The game will give the players an opportunity to fly the plane on Earth using textures and topographical data from Bing Maps. It will also feature some 3-D representations of the world's features, such as terrain, trees, grass, buildings, and water which will be created with the help of Microsoft Azure technology.
